Main Search Screen

Button to access presentations panel

Visualization Grouped by Region

When a chart is first viewed, an overlay with a description is shown.

Button for adding the current chart to a presentation

Visualization Grouped by Region

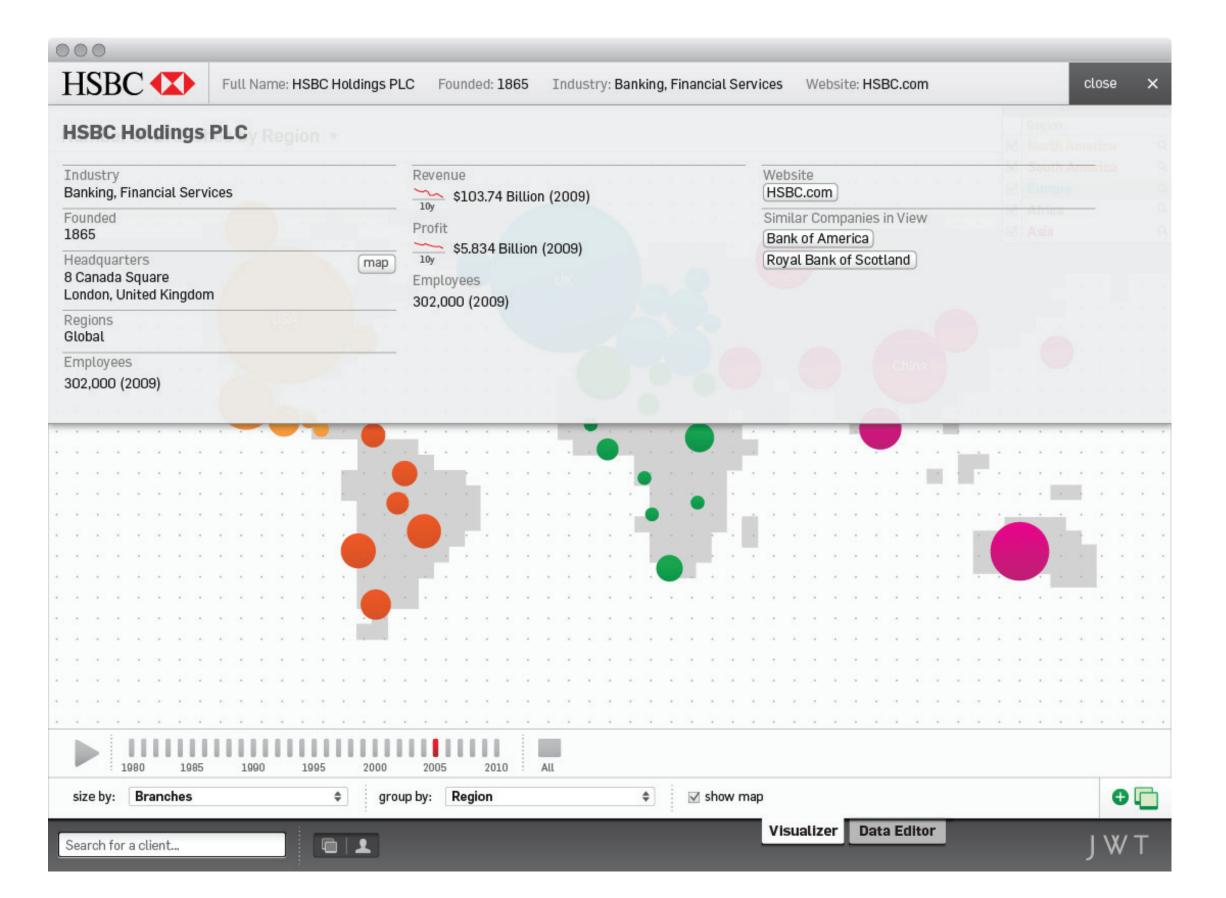

If the set has yearly data, the timeline bar is shown. The bar allows users to:

- 1. play the set, which shows an animated sequence of all years
- 2. select a specific year to jump to it
- 3. see an average of all years

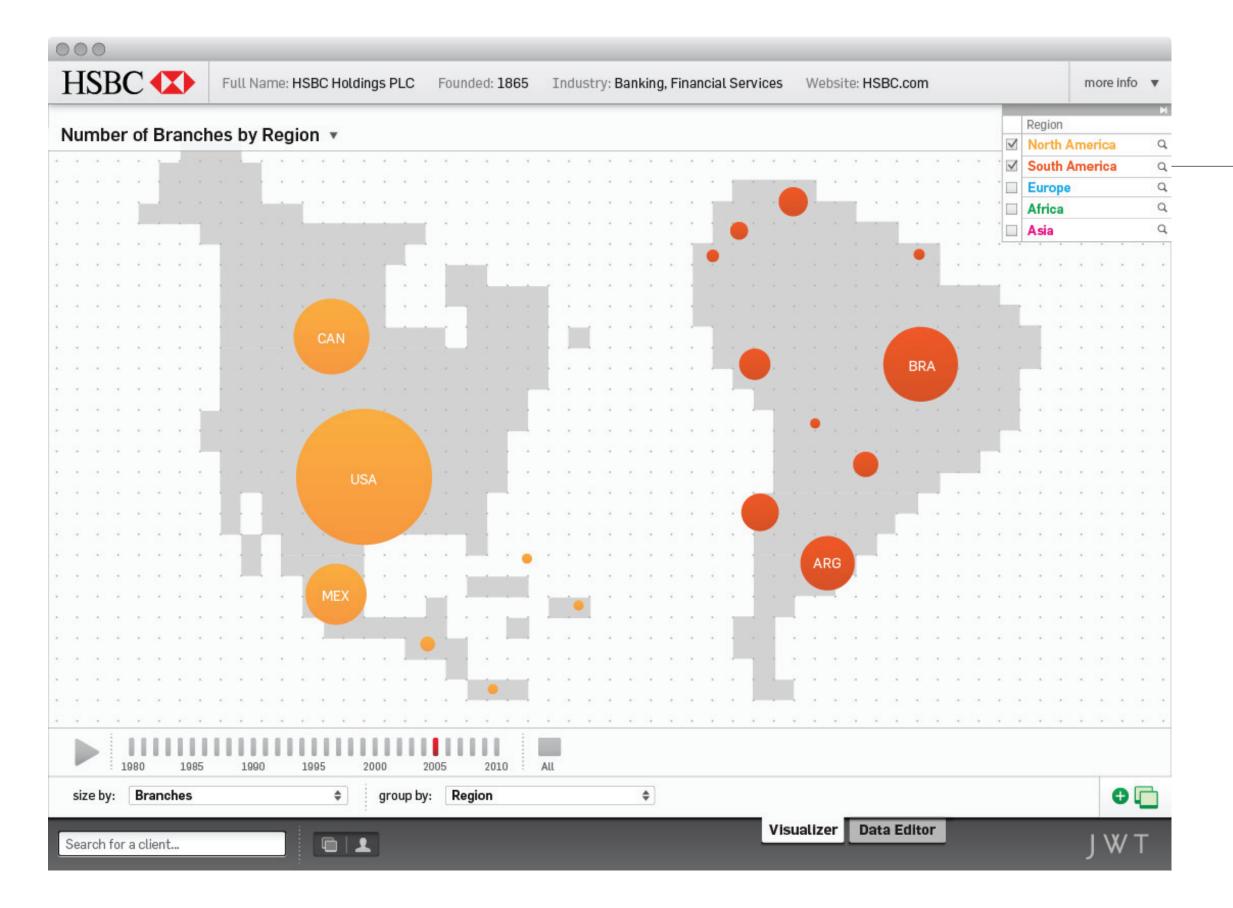

Visualization Grouped by Region

On rollover, year buttons enlarge and show a tooltip. The red button indicates the selected year.

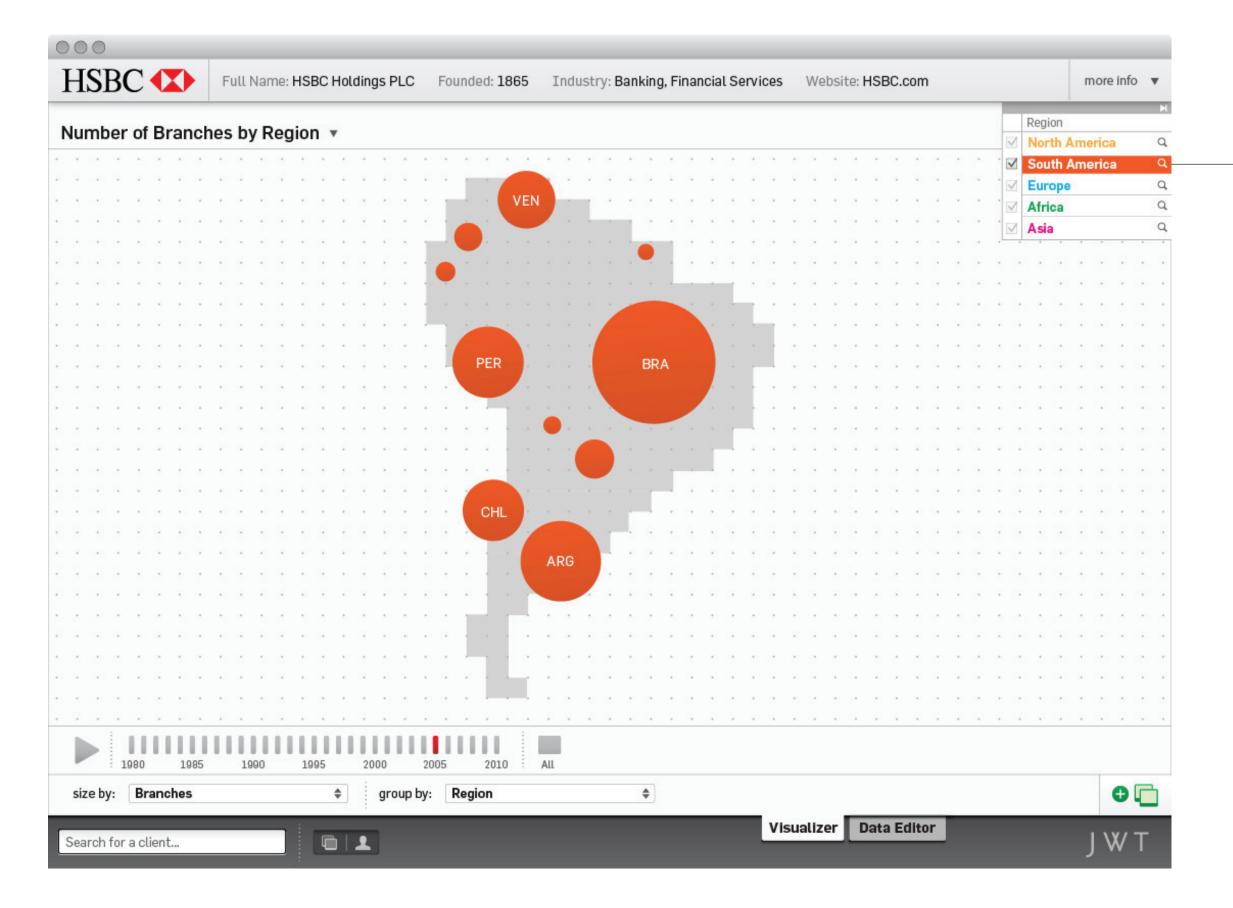

Expanded Company Info

Controlling Which Regions Are Displayed

The check boxes in the key toggle the visibilty of groups. In this case, only North and South America are shown because the other continents have been un-checked.

Isolating or Zooming in on a Group

Clicking the name or magnifying glass of a group enlarges it to fill the viewable area and hides the other groups.

The Presentations Panel

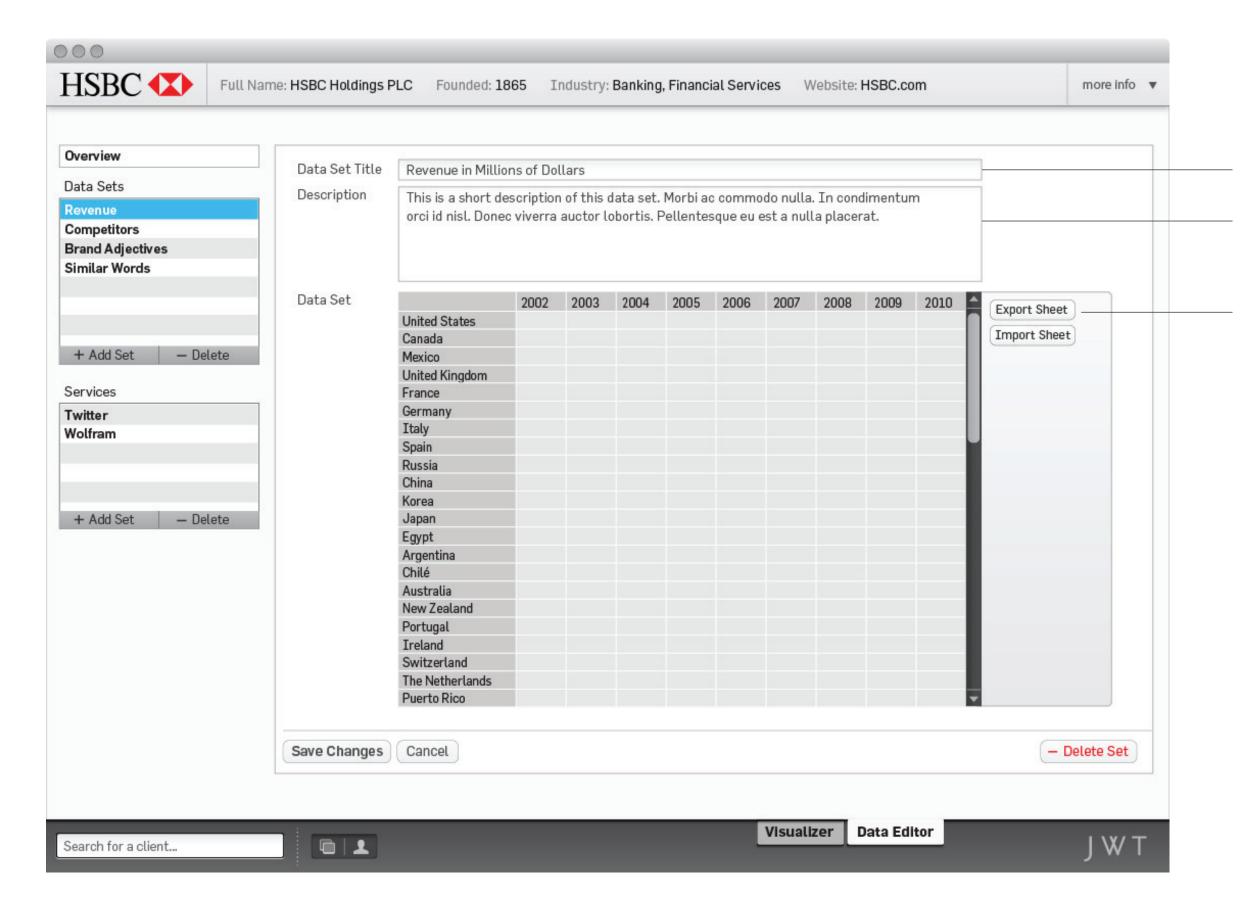

Charts are added to this panel via the green add chart button (see page 3). Only logged in users can create/modify presentations.

The slides of the selected panel are shown here. They can be re-ordered by dragging.

Plays the presentation in fullscreen

Exports the presentation as a PDF

Presentations are added, deleted, and selected in the left panel.

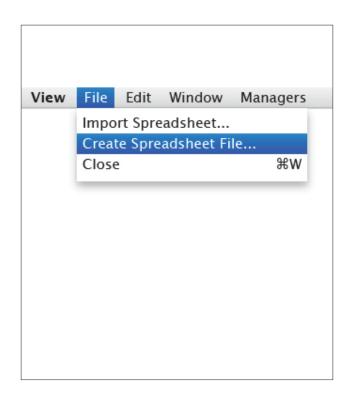

Editing a Data Set

The title that appears in the visualizer tab can now be edited

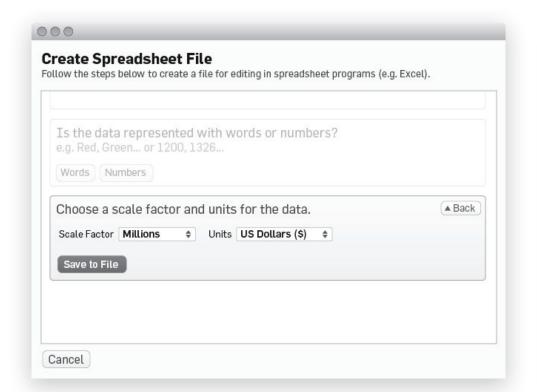

The description that appears under the title

Spreadsheets can be edited here or in an external editor (e.g. Excel). The export button saves the sheet and any edits made to it to a file that can be opened in the external editor. Files edited externally can be brought back in via the import button. This process can also be completed via the application menu (see following page).

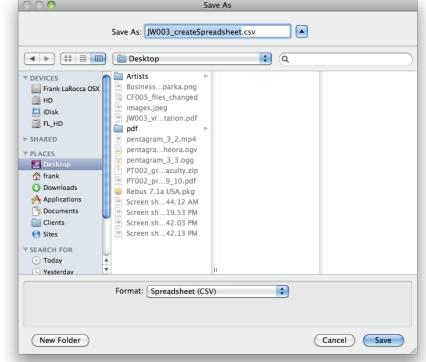

Create a Spreadsheet File from the Application Menu (for External Editing)

Begin the 'create spreadsheet' wizard via the file menu.

A new window opens that prompts the user for information that will help set up the spreadsheet.

3. Choose a location to save the file.

4. Open the file in a spreadsheet editor.
